# PhD Program Overview

#### "สร้างนวัตกรด้านดิจิทัล"

School of Architecture and Design at KMUTT is the first International design school in Thailand to offer a doctor of philosophy (PhD) in design and planning. The aim of the program is to create a disruptive design innovators who contribute to create new design knowledge based on research. After finishing the program, the graduate students are able to adapt themselves and learn fast in the digital era. Students are able to create a disruptive design innovation with a long vision, holistic view of system and knowledge connection. Moreover, they have an in depth understanding in problem solving of their own field and integrate other disciplines.

# Program Educational Objectives

- Innovators who able to design an disruptive Innovation through the research topics from industry/community.
- Professional in design and well-round other discipline in order to integrate skill and knowledge.
- Thinkers who can solve the design problem that is complex. They
  can think systematically and explain the holistic view that leads to
  innovation.
- Enhancing their professional with the life-long learning and ready to the change of digital era.
- Skillful in communication related to design and excellent in academ ic writing and presenting their research.

Length of study: 3 years

Timing

6 semesters (beyond Master degree) 12 credits for core courses and 36 credits for dissertation.

## **Course Description**

DPL 771 Design Disruptive Innovation

3(3-0-9)

Preparation students to effectively manage creativity in the process of generating high potential ideas and converting them into design disruptive new models. Comprehensive foundation for additional learning in the context of innovative model design. Far more as practice than theory. The emphasis throughout the course on drawing and synthesizing concepts, practices, and techniques.

DPL 772 Data Analytics in Innovation Research

3(3-0-9)

Skills, tools and knowledge of data analytic to identify the pattern and predict through visualization. Data modeling technique as a mean to explore new knowledge in conjunction with design research and design thinking.

DPL773 Forum for PhD Research

1(0-2-3)

Activity that supports the knowledge exchange. Closing the gap of industry demand and education with forum. Special interest group for research topic, collaboration and knowledge exchange.

DPL 774 Learning in Digital Age

3(3-0-9)

Techniques and methods how to learn and practice faster on new things and skills in digital age. Several kinds of learning techniques in psychology. Learn how to understand their own selves as a mean to identify strengths, performances, values and planning for success.

#### DPL775 Maker Space

2(0-4-6)

Work space where people with common interest. Function as centers for peer learning and sharing resources to build and make things. Multidiscipline include designers, artists, engineer, scientists, and computer scientists. The facility including machine shops, software station and reflection area.

DPL 776 Writing Research Article for Publication 3(3-0-9)

Framework of writing research articles for publication including manuscript for submission to an international refereed journal. Three key areas necessary success. Developing strategy for publish. Developing story with a compelling research article. Using language to enhance clear and effective communication.

#### DPL 800 Dissertation

36 Credits

Prerequisite: Pass Qualifying Examination, QE

Students enrolled are required to carry out an original research on a topic related to design and planning under the supervision and approval of the advisory committee. Each student has to present his research progress in the seminar for every semester for his dissertation enrollment.

## How to apply

#### "เกณฑ์การรับสมัคร"

- Transcripts from all prior degrees. GPA in master program should not less than 3 respectively. For international applicants without a bachelor's or master's degree from an accredited English-language university, a TOEFL or IETLS test is required. (TOEFL IBT minimum 79, IETLS minimum 6.5)
- Research Proposal. Guidance for the proposal will be provide by the PhD faculty members. Before final submission of the application, all applicants to the PhD program must contact and discuss a research proposal with a PhD faculty.
- Interview. Conducted by phone, Skype, or in person with the PhD Program Coordinator.
- Portfolio of work or published material.
- Resume or Curriculum Vitae. 2-4 years of professional practice is typical. Include peer recognition (e.g., publications, lectures, awards).
- Letter of recommendation. Three letters from professional or academic references commenting on your goals and abilities.
- · Application fee.

- Petchprajomklao scholarship ทุนเพชรพระจอมเกล้า
- Presidential scholarship for international student (started from academic year 2020)
