

## Social Volunteer Camp Program

SoA+D Social Volunteer Program is a platform where young volunteers who currently studied at their home universities can join and work with our partner communities in Bangkok and Thailand's upcountry area – Ratchaburi, Nan, Sakon Nakhon, Buriram, and Chiang Mai.

We provide volunteer opportunities where you can help in empowering these local village communities in diverse fields - from education to architecture and health-wellbeing, from food & agriculture engineering to energy and environmental sustainability. Volunteers also have an option of working with our partner local NGOs for different community development courses

The program provides flexible timeframe for each applicant, starts from 2 weeks to 4 months. We do recommend a longer time period so you can really build rapport and make friendship with the communities and deeply understand the challenges.

Both SoA+ D and international exchange students from partner universities ([Please see the list of partner universities here](#)), are welcomed to join the program. Length of stay, working site, and topic of interest can be discussed via email. If interested please kindly email to [woranooch.lee@kmutt.ac.th](mailto:woranooch.lee@kmutt.ac.th) or [thitikarn.sri@kmutt.ac.th](mailto:thitikarn.sri@kmutt.ac.th) for further information.
